Why Agile?
Agile is primarily a culture and mind-set change. It initiates mind-shift from command & control management practices to collaborative, team centric environments. Agile is a philosophy that uses organizational models based on people, collaboration and shared values. Agile is an iterative and incremental approach to project management that helps teams deliver value to their customers faster. Agile gives an opportunity to the team to learn with each new iteration. Requirements, plans, and results are evaluated continuously for responding to change and value delivery quickly. Scrum is the most popular and widely used framework practising Agile values.
