Why Agile?

Agile is primarily a culture and mind-set change. It initiates mind-shift from command & control management practices to collaborative, team centric environments. Agile is a philosophy that uses organizational models based on people, collaboration and shared values. Agile is an iterative and incremental approach to project management that helps teams deliver value to their customers faster. an Agile team delivers work in small, Agile gives teams an opportunity to learn with each new iteration. Requirements, plans, and results are evaluated continuously for responding to change and value delivery quickly. Scrum is the most popular and widely used framework practicing Agile values.

Why Professional Scrum Master Certification (PSM)?

This workshop covers the principles and empirical process theory underpinning the Scrum framework, and the role of the Scrum Master in it. PSM is the cutting-edge course for effective Scrum Masters and for anyone coaching a software development team toward increased efficiency and effectiveness. The workshop includes advanced thinking for servant-leadership and behavioural shifts. In this workshop students are challenged to think in terms of the Scrum principles to better understand what to do when returning to the workplace. The PSM workshop deals with real-life cases, discussions and hands-on exercises.
